Board of Directors’ Report

HIGHLIGHTS

The Group’s results improved in the first half of 2025 compared to the first half of 2024. Total operating income for the first half amounted to NOK 6 564 million, and the Group had an underlying growth of 15.8 percent (adjusted for other income). Adjustment of airport fees from February 2025 contributes to higher fee income. In addition does a traffic growth of 4.1 percent contribute positively. Total operating expenses in the first half of 2025 amounted to NOK 4 459 million, representing an underlying growth of 4.9 percent (adjusted for other expenses). This is mainly explained by general increases in prices and wages. Adjusted income and expenses are calculated in the appendix “Alternative performance measures”. Adjusted EBITDA was NOK 689 million in the first quarter of 2025, an increase of NOK 299 million from the first quarter of 2024.

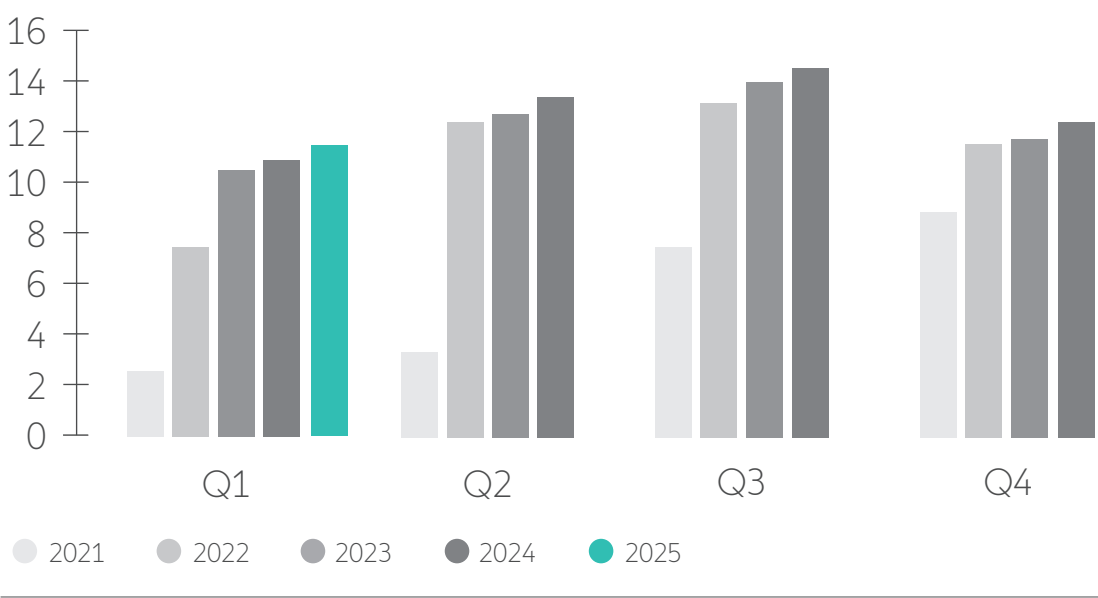

TRAFFIC DEVELOPMENT

25.3 million passengers travelled through Avinor’s airports in the first half of 2025, an increase of 4.1 percent compared to the first half of 2024. In the second quarter, 13.9 million passengers travelled through the airports, representing an increase of 2.6 percent compared to the second quarter of 2024.

Growth in the first half for domestic and international traffic was 3.3 and 5.1 percent, respectively. International traffic

accounted for 40.9 percent of the total number of passengers in the first half of 2025, compared to 40.5 percent in the first half of 2024.

The table below shows the quarterly development in number of passengers since 2021.

NUMBER OF AIR PASSENGERS, JANUARY - JUNE

in 1000	2025	2024	CHANGE
Oslo Airport	12 802	12 395	3,3 %
Bergen Airport	3 116	3 074	1,4 %
Stavanger Airport	1 923	1 919	0,2 %
Værnes Airport	2 045	1 976	3,5 %
Regional Airports	5 427	4 955	9,5 %
Avinor Group	25 312	24 319	4,1 %

The number of aircraft movements was 2.2 percent higher in the first half of 2025 compared to the first half of 2024. The increase for international aircraft movements was 1.8 percent, while for domestic aircraft movements and offshore aircrafts movements the increase was 1.8 and 8.8 percent, respectively. The regional airports had the highest growth from last year, with an increase of 9.5 percent.

The load factor in the first half of 2025 was 72.8 percent, of which the load factor was 70.5 percent on domestic flights and 76.3 percent on international flights.

Based on input from the airlines, a slightly positive capacity development of 1.2 percent is expected for the next two quarters compared with last year. For the third quarter a capacity growth of 1.6 percent is expected. For the fourth quarter a capacity growth of 0.7 percent is expected.

Over the last 12 months, Avinor’s network of airports recorded an average punctuality of 85 percent and an average regularity of 98 percent.

AIR SAFETY

In the first half of 2025, four potentially serious aviation incidents have been identified. Mapping and investigations are ongoing.

FINANCIAL PERFORMANCE

Avinor Group

	APRIL - JUNE			JANUARY - JUNE		
Amounts in MNOK	2025	2024	ENDRING	2025	2024	CHANGE
Operating income	3 636	3 147	15,5 %	6 564	5 654	16,1 %
Operating expenses	(2 228)	(1 861)	19,7 %	(4 459)	(4 046)	10,2 %
EBITDA *	1 408	1 286		2 105	1 608	
Operating profit (loss)	791	720		875	477	
Operating margin	21,7 %	22,9 %		13,3 %	8,4 %	
Profit (loss) after tax	473	427		386	51	
Adjusted operating income *	3 623	3 132	15,7 %	6 527	5 635	15,8 %
Adjusted operating expenses *	(2 240)	(2 076)	7,9 %	(4 454)	(4 188)	6,4 %
Adjusted EBITDA *	1 383	1 056		2 072	1 447	
Adjusted operating profit (loss) *	766	490		843	316	
Adjusted operating margin *	21,1 %	15,6 %		12,9 %	5,6 %	

* Defined and calculated in the appendix "Alterntative performance measures"

The Group’s total operating income for the first half of 2025 amounted to NOK 6 564 million, an increase of NOK 910 million from the first half of 2024. The Group’s total operating expenses for the first half of 2025 amounted to NOK 4 459 million. This is an increase of NOK 413 million compared from the same period previous year. The results for the first half of this year include other items with a positive result contribution of net NOK 32 million compared to NOK 161 million in positive result contribution in the first half of 2024.

Adjusted revenues in the first half of 2025 compared to the same period in 2024 is up with 15.8 percent. Revenue growth is driven by both increased passenger volume and increased income per passenger. This year’s adjustment of airport fees from February 2025 also contributes to higher fee income. At the same time, the government’s air passenger tax was reduced by about NOK 600 million annually.

Adjusted operating expenses for the first half of this year are 6.4 percent higher compared to the first half of last year. This is mainly explained by general price and wage growth and project activities, but also partly by increased traffic activity.

Avinor continuously works to adapt costs to ongoing operations. A high proportion of the Group’s cost base is, however, relatively fixed and necessary to maintain safe and stable operations as required by the social mission, and in order to perform government mandated tasks. The Group’s adjusted EBITDA for the first half of 2025 was NOK 2 072 million, which is an increase of NOK 626 million compared to the first half of 2024.

The Group’s total depreciation and amortisation for the first half of this year amounted to NOK 1 230 million compared to NOK 1 130 million for the same period last year.

The Group’s net financial result for the first half of this year was minus NOK 381 million compared to minus NOK 413 million in the first half of 2024. Compared to the first half of 2024, realised and unrealised effects related to currency and derivatives contribute positively to the financial result for the first half of this year.

The result after tax for the Group was NOK 386 million in the first half of 2025, which is an improvement of NOK 335 million compared to the first half of 2024.

Airport operations

AIRPORT OPERATIONS - RESULTS

	APRIL - JUNE			JANUARY - JUNE		
	2025	2024	CHANGE	2025	2024	CHANGE
Adjusted operating income (MNOK) *	3 151	2 744	14,8 %	5 612	4 895	14,6 %
Adjusted operating expenses (MNOK) *	(2 414)	(2 234)	8,0 %	(4 813)	(4 518)	6,5 %
Adjusted operating profit (loss) (MNOK) *	737	510		798	377	
Adjusted operating margin	23,4 %	18,6 %		14,2 %	7,7 %	
Adjusted operating income per passenger (NOK) *	227	203	11,9 %	222	201	10,1 %
Adjusted operating expenses per passenger (NOK) *	(174)	(165)	5,3 %	(190)	(186)	2,3 %
Adjusted operating operating profit (loss) per passenger (NOK) *	53	38		32	15	

* Defined and calculated in the appendix “Alterntative performance measures”

Adjusted operating income amounted to NOK 5 612 million in the first half of 2025, an increase of 14.6 percent compared to the same period of the previous year. Both an increase in passenger numbers and profit per passenger contribute to growth. In addition, higher airport charges effective from February 2025 have a positive effect on segment income. Passenger growth in the first half of 2025 compared to the first half of 2024 was 4.1 percent. Commercial income as a share of adjusted operating income for airport operations was 50.4 percent in the first half of 2025, down from 55.4 percent in the first half of 2024.

Adjusted operating expenses were NOK 4 813 million in the first half of 2025. This is an increase of 6.5 percent from the first half of 2024 and is mainly explained by general price and wage increases, but also partly by increased traffic activity.

Adjusted operating expenses per passenger have shown a moderate increase in the first half of 2025 compared to the first half of 2024, while adjusted operating income per passenger increased. Adjusted operating profit was NOK 798 million compared to NOK 377 million in the same period last year. The improvement is due to a higher number of passengers and profit per passenger.

Air navigation services

AIR NAVIGATION SERVICES - RESULTS

	APRIL - JUNE			JANUARY - JUNE		
	2025	2024	CHANGE	2025	2024	CHANGE
Amounts in NOK million						
Adjusted operating income *	671	589	13,9 %	1 308	1 143	14,4 %
Adjusted operating expenses *	(642)	(609)	5,5 %	(1 264)	(1 204)	4,9 %
Adjusted operating profit (loss) *	29	(20)		44	(61)	
Adjusted operating margin	4,3 %	-3,4 %		3,4 %	-5,3 %	

*Defined and calculated in the appendix “Alterntative performance measures”

Adjusted operating income for the first half of 2025 amounted to NOK 1 308 million, which is an increase of 14.4 percent compared to the first half of 2024. The revenue growth is mainly due to increased price per service unit. From 2025 onwards, a new reference period for en route services started, running from 2025 to 2029.

Adjusted operating expenses were NOK 1 264 million in the first half of 2025, an increase of 4.9 percent compared to the first half of 2024. Air navigation is carrying out several extensive government-mandated technology projects entailing increased project costs.

Adjusted operating profit for the first half of 2025 was NOK 44 million, compared to minus NOK 61 million in the same period last year.

Norway’s submitted performance plan related to the delivery of en route services for the period 2025-2029 has been rejected. There is uncertainty as to when a final performance plan for the period will be officially adopted. Rejection of the performance plan resulted in the recognition of an impairment of NOK 528 million on operational assets related to the air navigation business as of 31 December 2024. As of the end of June this year, an updated impairment test was carried out. This concludes that no further impairment losses should be recognised for assets related to the en route service (which is part of the air navigation segment) as of 30 June 2025. See note 7 for further information.

Financial position

KEY FIGURES - FINANCIAL POSITION

Amounts in NOK million	30 JUNE 2025	31 DECEMBER 2024	CHANGE
Non-current assets	44 056	43 940	116
Current assets	4 321	7 598	(3 277)
Total assets	48 377	51 537	(3 161)
Equity	15 132	15 106	26
Non-current liabilities	28 441	29 294	(853)
Current liabilities	4 804	7 137	(2 334)
Equity and liabilities	48 377	51 537	(3 161)
Interest-bearing debt *	24 466	28 157	(3 690)

* Defined and calculated in the appendix “Alterntative performance measures”

Total assets as of 30 June 2025 amounted to NOK 48.4 billion, which is a decrease of 6.1 percent compared to 31 December 2024. The reduction in the Group’s balance sheet in the first half of 2025 is primarily driven by repayments of interest-bearing debt.

There is a close follow-up and continuous focus on prioritisation in the project portfolio. The Group has several large ongoing investment projects. Investments to upgrade baggage handling facilitiy at Oslo Airport and government-mandated projects related to the renewal of systems for control and surveillance of airspace particularly contribute to high investments.

The Group’s book equity as of 30 June 2025 was NOK 15.1 billion, and equity in relation to total capital was 31.3 percent. This is 2

percentage points higher than 31 December 2024. Equity as required by the Articles of Association, defined as equity as a percentage of total equity and net interest-bearing liabilities, as of 31 March 2025 was 42.1 percent. See the appendix “Alternative performance measures.

The Group has a substantial net pension liability recognised in the statement of financial position. Parts of the Group’s pension funds are linked to the returns in the Government Pension Fund Global (GPFG). In the first half of 2025, there has been negative value development in the GPFG, which leads to an increase in the net recorded pension liability, see Note 8. Other liabilities are mainly related to the recorded liability for environmental cleanup costs, see Note 13 for further information.

The group’s interest-bearing debt as of 30 June 2025 amounts to NOK 24.5 billion, of which NOK 1.6 billion is short-term.

Cash flows, January - June

Amounts in NOK million	2025	2024	CHANGE
Cash flow from operating activitites	2 156	1 312	844
Cash flow used in investing activities	(1 774)	(1 642)	(132)
Cash flow from (used in) financing activities	(3 413)	4 414	(7 827)
Cash flow before changes in debt *	(219)	(842)	624

* Defined and calculated in the appendix “Alterntative performance measures”

The Group had positive cash flows in the first half of 2025 from operations of NOK 2 156 million, while the cash flows used in investing activities and financing activities were negative with NOK 1 774 and 3 413 million, respectively. Cash flow before changes in debt was negative by NOK 219 million.

During 2025, the Avinor Group entered into a new revolving credit facility agreement worth NOK 6 billion, with a term until 2030. As of 30 June 2025, the Group had a liquidity reserve of NOK 7.9 billion. This is divided into NOK 1.6 billion in cash and cash equivalents and NOK 6.3 billion in unused drawing rights.

EMPLOYEES

In the last 12 months, the H1 value (frequency of absence due to injuries) amounted to 2.2 for the Group, which is a reduction from 2.1 at the end of 2024. The H2 value (frequency of injuries with and without absence) amounted to 4.4, which is down from 4.8 at the end of 2024. The N-value (frequency of reported near misses) was 55.1 at the end of the first half of 2025, from 44.5 at the end of 2024.

The sickness absence rate in the first half of 2025 was 4.1 percent. Notably, long-term sickness absence has shown a positive downward trend over time. The group has undertaken targeted efforts to address sickness absence through survey projects and leadership training initiatives.

RISK FACTORS

Avinor is exposed to a wide range of risks that may affect the Group’s operations, financial results and financial position. Factors resulting in the loss of air traffic volume may have a significant negative impact on Avinor, such as changes in travel habits, geopolitical and regulatory issues.

Safe and stable operations with a risk-based approach is one of the Group’s long-term priorities and governs all operational

activities in the Group.

In Chapter 5 “Risk Factors” in Avinor’s Annual and Sustainability Report for 2024 the most significant risks and uncertainties that could affect Avinor’s operations are further described. As of the issuance of this interim report, no factors have been identified that significantly alter the risk factors.

OUTLOOK

As a result of the approved increase in airport charges in the 2025 national budget and the Ministry of Transport’s framework decision for the regulation of airport charges, Avinor expects improved financial earnings in the coming years, despite an assumed moderate traffic growth going forward. It has been concluded that as of 30 June 2025, there is no impairment loss on the operating assets in the airport operations. For the en route services, there is uncertainty related to revenues due to the rejection of Norway’s submitted performance plan for the period 2025 to 2029 on the 9 July 2025. Avinor and the Ministry of Transport are in the process of preparing a revised performance plan, with deadline 9 October 2025. As of 31 December 2024, a write-down of NOK 527.9 million was made on the assets for en route services. As of 30 June 2025, it is concluded that no further impairment should be recognised. For more details, refer to note 7.

Dialogue continues with the Ministry of Transport regarding the follow-up of recommendations from KPMG in the independent company review conducted in 2024. This includes, among other things, the scope Avinor should have to optimise its own operations and cash flow, financing tasks that Avinor performs for other sectors, as well as capital structure and dividend policy.

Avinor expects moderate traffic growth up towards 57 million passengers in 2031. Foreign passenger traffic to Norway is expected to have strong growth, while domestic traffic levels off. New travel patterns and new customer groups affect Avinor’s commercial revenues and place changing demands on service offerings at airports. Avinor’s traffic- and commercial revenues are exposed to changes in traffic volume driven by both reduced supply from airlines and reduced demand for air travel from the market. Avinor’s traffic- and financial forecasts take into account these market conditions as best as possible.

There is a high focus on Avinor’s extensive project portfolio. This particularly applies to the construction of new airports in Bodø and Mo i Rana, upgrades to airports in Tromsø, Evenes and Andøya and technological generation shifts in air traffic management systems in en-route and tower services. The

changed security policy situation with new requirements for national total defence in general, and the Norwegian Armed Forces in particular, may lead to ongoing premise changes that represent a risk of increased costs for the development projects that interface with the Armed Forces.

Aviation in Norway must be competitive and is facing a period of major investments to also support the transition to sustainable aviation. Avinor will be an active contributor to this work through reduction of own greenhouse gas emissions, facilitate for reduced emissions from aircrafts and contribute to initiatives for facing in of zero- and low emission technologies.

Oslo, 27 August 2025
Board of Directors of Avinor AS

NOTE 1 General information

Avinor Group consists of Avinor AS and subsidiaries. The purpose of the Group is to own, manage and develop aviation infrastructure and systems by facilitating safe and efficient aviation, render services within the same areas as well as other activities to support the Group’s main business, including commercial development of the business and airport areas.

The headquarter is located in Oslo, Dronning Eufemias gate 6A.

The interim financial report for the second quarter and first half of 2025 has not been audited, nor been subject to a limited audit review.

The Board of Directors approved the interim financial report on 27 August 2025.

NOTE 2 Accounting principles

The interim financial statements for the second quarter and first half of 2025 are prepared in accordance with IAS 34 Interim Financial Reporting. The interim financial statements do not provide information to the same extent as the annual financial statements and should therefore be read in context with the Group’s financial statements for 2024, which are included in Avinor’s Annual and Sustainability Report for 2024. The same principles have been applied in the preparation of the interim financial statements as in the preparation of the consolidated financial statements.

Income tax expense in the interim financial statements

The income tax expense in the income statement consists of the calculated tax payable on the taxable result and changes in deferred tax. Tax expenses related to items in other comprehensive income are presented on separate lines in the statement of other comprehensive income.

Deferred tax assets are calculated based on items where there is a difference between tax and accounting values at the expected tax rate to be used when the tax position is realised.

Tax payable in the Group’s statement of financial position is based on the estimated taxable profit at the end of the period, as well as the calculated income taxes payable from previous years, reduced by prepaid income taxes.

NOTE 3 Segment information

Operating segments are reported in the same way as in internal reporting to the company’s ultimate decision-maker. The company’s ultimate decision-maker, who is responsible for allocating resources to and assessing earnings in the operating segments, has been identified as Group management.

The Avinor Group’s operations currently include air navigation services and 45 airports including Oslo Airport. The operating segments are identified based on the reporting used by group management when assessing performance and profitability at a strategic level. The segment information shows operating profit and total investments broken down by internal organisation in the Group.

For management purposes, the Group is organised in an airport segment and an air navigation segment, but to provide a better view of the airport segment, information is provided below about the airports at Oslo, Bergen, Stavanger, Trondheim and the

remaining airports (regional airports) separately in addition to property. Property includes income from hotels and office buildings.

Shared functions comprise technology, corporate staff (including finance, commercial/ marketing, strategy, HR, and legal) as well as other shared professional environments.

Avinor’s financial model is based on the authorities’ mandate of full co-financing between profitable and unprofitable airports, and that commercial profits should subsidise airport charges (the “single till” principle). The segment information for the various airports in this note must be assessed in light of the economic interdependence between the airports.

Sales between operating segments are carried out in accordance with the arm’s length principle. Allocation of costs related to shared functions within the airport segment is either based on a direct allocation according to the actual use of the functions, or

internal allocation keys reflecting the use of the functions. The revenue from external parties reported to group management is measured consistently with that in the income statement.

Avinor has defined en route services (air navigation services) and airport operations as the Group’s cash-generating units, implying that the combined airport operations and en route services are the smallest units in the Group that generate independent cash flows. Additional information on cash-generating units can be found in note 7.

1) The Avinor Group has applied for a refund of social security tax based on lower rates for employees who are not covered by the sector exemption for differentiated social security tax. The refund has been approved and refunded in 2024. The effect of the refund is presented in the income statement as a cost reduction in Employee benefit expenses, and allocated with NOK 136 million to the segment airport operations (regional airports) and NOK 78 million to the segment air navigation services.

NOTE 4 Operating income

Operating income for the Avinor Group consists of traffic income and commercial income. Traffic income comprises all charges related to the use of airports and services necessary to operate flights to/from and within Norway. Commercial income consists of income from the sale of goods and services and rental income.

For detailed information on the various revenue streams of the Avinor Group, see Note 5 in the Group’s financial statements for 2024. The financial statements are included in Avinor’s Annual and Sustainability Report for 2024.

Distribution of revenues	APRIL - JUNE		JANUARY - JUNE		YEAR
	2025	2024	2025	2024	2024
Amounts in NOK million

* Commercial income consists of income from the sale of goods and services as well as rental income.

NOTE 5 Other income and other expenses

Other income and other expenses include gains and losses on disposals of fixed assets and other intangible assets, government grants, insurance settlements, changes in environmental provisions, and restructuring costs.

Specification

Amounts in NOK million	APRIL - JUNE		JANUARY - JUNE		YEAR
	2025	2024	2025	2024	2024
Other income					
Profit from disposal of non-current assets	3,2	3,0	5,2	3,9	5,7
Government grants/refunds	9,4	11,9	31,9	15,6	46,4
Other income	12,5	14,9	37,2	19,5	52,1
Other expenses					
Loss from disposal of non-current assets	(0,2)	(5,5)	(0,2)	(5,5)	(7,8)
Change in provision for environmental pollution (note 13)	12,3	(10,5)	(4,7)	(58,2)	(133,9)
Accrual severance arrangements/gift pensions	-	-	-	(25,0)	(32,5)
Other expenses	12,1	(15,9)	(4,9)	(88,8)	(174,2)

Parts of the recognised government grants are related to the coverage of project expenses for the construction of new airports in Bodø and Mo i Rana. See note 12 for further details on these projects.

Changes in environmental provisions concern changes in liabilities and calculated present value effects. Note 13 has more information.

During 2024, the Group’s employees were informed that they can apply for a voluntary severance agreement/gift pension. At year-end 2024, virtually all employees who received an offer have decided whether they want to accept, but not all have decided on the start date of the agreement. Expensed provisions are based on calculations of the total liability for concluded contracts and are calculated by an external actuary. The amount expensed in 2024 therefore represents management’s best estimate of the present value of signed severance agreements in 2024. The severance agreements/gift pensions are included in pension liabilities in the Group’s statement of financial position.

* Reclassification of assets under construction relates to completed assets/projects presented as additions in the relevant asset categories. Final decompositions into asset categories within both intangible assets and fixed assets are carried out in connection with the completion of facilities/projects.

NOTE 7 Impairment of property, plant and equipment and intangible assets

Avinor has significant investments in infrastructure, buildings and other real estate required to own, operate and develop airport operations and air navigation services. Avinor has defined two cash-generating units: en route services (air navigation services) and airport operations. For airport operations, Avinor’s financial model is based on the authorities’ mandate of full co-financing between profitable and unprofitable airports, and that commercial profits shall subsidise airport charges (the “single till” principle). Based on this, the Group’s total airport operations are defined as one cash-generating unit.

Impairment indicators are assessed on each reporting date for individual assets and cash-generating units, and impairment testing is performed if any indicators have been identified. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate based on the weighted average capital cost (WACC) rate. The WACC reflects current market assessments of time value of money and risks specific for the asset or the cash-generating unit to which the asset belongs.

AIRPORT OPERATIONS

The cash-generating unit airport operations is sensitive to changes in traffic patterns. Both the digitalisation trend that emerged during the Covid pandemic, in particular for business travellers, and increased attention on climate, environment, and sustainability, imply a risk of permanent changes in travel habits. This may result in fewer passengers or lower traffic growth than anticipated, leading to lower revenues for the Group’s airport operations. The global geopolitical and economic developments add to further uncertainties in projections for future traffic and revenues. As of 30 June 2025, the risk of a permanent reduction in the number of passengers with corresponding lower revenues is considered to be an impairment indicator for airport operations.

As a result of identified indicators of impairment for the airport operations, an updated impairment test has been carried out for this cash-generating unit as of 30 June 2025. The impairment test takes into account updated forecasts for traffic development that form the basis for collected airport charges and commercial income, costs and investment levels.

Key judgements and estimates

The most important requirement for achieving the necessary improved earnings is real growth in Avinor’s airport charges. In a letter dated 20 November 2024 “Determination of airport charges for Avinor’s airports” and in a letter of 12 December 2024 “Framework decision on Avinor AS’ takeoff and terminal charges in the years 2025-2029”, the Ministry of Transport confirmed that its multi-year binding decision regarding airport charges aims to avoid write-downs of Avinor’s assets, and that the Ministry is aware of the fact that this requires an annual increase in airport charges estimated at about NOK 1.7 billion over the next three to five years compared to the current situation. For 2025, a larger part of this increase had been included in the airport charges, while the state’s air passenger tax has been reduced by about NOK 600 million. For 2026, the Ministry of Transport plans to set airport charges so that the deficit in relation to estimated demand according to the “single till” model is limited to NOK 200 million, while the fees for 2027 will be equal to the estimated need. With current forecasts and assumptions, Avinor estimates that this will result in a further increase in airport charges of NOK 1 billion compared to current levels.

For the updated impairment test as of 30 June 2025, the period July 2025 through December 2030 is used as the forecast period. From the terminal year in 2031, it is assumed that revenues and costs have a fixed growth factor. The value in use is calculated as the total of the discounted cash flows during the forecast period and the terminal value.

The significant part of the value in use comes from the terminal value. Assumptions affecting the terminal value are therefore considered to be the most important in the impairment assessment. These are set out below and represent management’s best estimate of the likely outcome:

AIRPORT OPERATIONS	
Key assumptions	
Number of passengers terminal year 2031 (millions)	56,6
Result improvement terminal year 2031 (NOK billion) *	1,4
Growth in terminal value	2,0 %
Post-tax rate of return requirement	5,9 %

* Improvement in operating result in 2031 in excess of estimated result with consumer price index adjustment of the airport charges for 2025. The improvement in results is necessary to have a reasonable return on invested capital. The improvement in results is assumed realised through an increase in airport charges and cost savings.

NOTE 7 Impairment of property, plant and equipment and intangible assets (continued)

Key assumptions

Number of passengers in terminal year 2031

The number of passengers of 56.6 million in 2031 is based on Avinor’s traffic forecasts for the period and a projected growth of 2 per cent at the terminal level. The traffic development up to 2025 is estimated in Avinor’s traffic analysis model and takes into account drivers within both the supply side (offered seats and aircraft movements) and demand side (development in GDP, tourism and travel trends). Expected seasonal patterns, changes in airport charges, reduced prices on FOT routes and planned maintenance work at airports are also considered. For the years 2026-2030, a normal growth for air traffic has been estimated with a particular view on the period 2015-2019 as comparable based on developments in the Norwegian economy, currency, tourism and general supply-side developments. Estimated effects from increased airport charges in the forecast period have been taken into account. The growth rates for the years 2028-2029 largely coincide with forecasts prepared by the Institute of Transport Economics (TØI), adjusted for updated expectations for developments in drivers such as GDP, purchasing power, unemployment and other indicators that may affect future demand. Expectations of higher CO2 costs (affecting both charges and quota prices) are included in the traffic forecasts from TØI. The baseline scenario in the long-term forecasts from TØI is related to the SSP2 scenario (Shared Socio-Economic Pathways). The assumptions in SSP2 have been further included in the uncertainty perspectives in both the SSP3 and SSP5 scenarios. Avinor’s long-term traffic development is assessed to be somewhere between the low-emissions and high-emissions scenarios used in the climate risk analyses in section E1 of the sustainability reporting.

Result improvement terminal year 2031

In a letter dated 20 November 2024 “Determination of airport charges for Avinor’s airports” and in a letter of 12 December 2024 “Framework decision on Avinor AS’ takeoff and terminal charges in the years 2025-2029”, the Ministry of Transport confirmed that their multi-year binding decision regarding airport charges aims to avoid write-downs of Avinor’s assets, and that the Ministry is aware of the fact that this requires an annual increase in airport charges estimated at about NOK 1.7 billion implemented over the next three to five years compared to the current situation. This includes the state budget decision for 2025 on a reduction in the air passenger tax of NOK 600 million and that Avinor can increase the airport charges correspondingly to maintain a competitive total increase in charges. In addition to this “conversion”, the airport charges in 2025 will be increased by approximately NOK 200 million. It is expected that Avinor also contributes by result improvements from own operations. The final realisation of these measures are central to ensure continued sustainable financial framework conditions for Avinor.

Based on the forecasts as of 30 June 2025, Avinor has calculated that result improvements of an average about NOK 1 billion are needed in the coming years in addition to what the airport charges would have amounted to with consumer price index adjustments

of the 2025 levels in order to substantiate the book value of assets. The reason for the difference between the estimate in the letter from the Ministry of Transport and Avinor’s estimate is that the calculation factors will change somewhat from period to period, including WACC. The basis for the forecast for the years 2025 to 2027 is an accumulated real increase in airport charges of about NOK 1 billion.

Growth rates in terminal value

Cash flows in the terminal value are extrapolated at an eternal growth of 2 percent based on expectations in future travel activity and inflation. Investments in the terminal value are determined to give an annual increase in invested capital of approximately 2 percent.

Required rate of return after tax

The required rate of return after tax of 5.9 percent (7.6 percent before tax) as of 30 June 2025 is based on market expectations for risk-free interest and debt rates, as well as an assessment of the return on equity expected for this type of business.

Conclusion

The impairment test performed as of 30 June 2025 shows that the value in use based on the assumptions accounted for exceeds the carrying value of assets. Consequently, Avinor has concluded that no impairment of assets for the cash-generating unit airport operations shall be recognised as of 30 June 2025.

Sensitivity analysis

The impairment test is sensitive to changes in the key assumptions. Should management’s best estimates not be met, it could lead to significant impairment losses. The value in use in particular will be adversely affected if Avinor’s improvement in earnings by airport charges is not adjusted as assumed in accordance with the “single till” principle. Improved results of only 50 percent of the cash flows used in the forecast period and terminal value would imply a negative change of the value in use of approximately NOK 12.1 billion and write-down requirements of assets of approximately NOK 9.1 billion. In the event of no result improvement, the decline in value in use would have been NOK 24.2 billion, resulting in a write-down of NOK 21.2 billion.

In addition, sensitivity analyses have been carried out of other key assumptions considered by management to be fairly probable downside scenarios. The analyses have been prepared to illustrate the uncertainty in management’s assessments.

NOTE 7 Impairment of property, plant and equipment and intangible assets (continued)

The calculation shows the value in use changes and the result improvement in terminal value, in addition to what is required and already included in the key assumption required to support the carrying values in the different scenarios. Changes in operating conditions or other profit increasing measures, like payments for services provided to other governmental departments or a reduced extent of Avinor’s social mission, can reduce the need for an increase in airport charges. In the scenarios assuming reduced growth in terminal value, the investments are unchanged compared to the impairment test carried out.

Furthermore, as an illustration, the estimated impairment is shown as if Avinor were only able to cover 50 percent of the necessary amount in excess of NOK 1.4 billion annually through profit improvements, including airport fees, in the terminal value.

EN ROUTE SERVICES

The cash-generating unit en route services is regulated by multi-year performance plans, divided into reference periods. From 2025, a new reference period will start and apply until 2029 (reference period 4 - RP 4). En route services are regulated by the EU. The purpose is that users of airspace will be charged the suppliers’ actual costs in addition to return on capital employed. The performance plan describes a risk-sharing between the supplier and airspace users for deviations in traffic and costs during the reference periods. The risk-sharing mechanism defines the costs that can be passed on to airspace users and the size of the discrepancy between assumed and actual revenues and costs before the risk-sharing mechanisms occur.

Norway’s submitted performance plan for reference period 4 has been rejected, and Avinor is in the process of delivering an updated performance plan.

Avinor has several objections to the premises for the recommended rejection of Norway’s performance plan, including that Norway’s unit cost is in fact among the lowest in Europe and that Norway, as a non-EU member, falls outside the “Connecting Europe Facility Transport” funding scheme, which other nations (EU members) benefit from. Nevertheless, Norway and Avinor participate fully in the common European cooperation on next-generation air traffic management systems but are financially penalised because necessary additional costs (transition costs) are not accepted by the PRB.

Rejection of the performance plan will lead to a financial mismatch between the en route charges that can be collected and what is necessary to operate the en route services. This risk has been assessed as an impairment indicator for the cash-generating en route services as of 30 June 2025. The Group has carried out an updated impairment test.

Key judgements and estimates

The updated impairment assessment takes into account the latest external forecasts for traffic development and new estimates for en route charges, costs and investments. The en route service is in a phase with significant government-mandated investments that goes beyond the next performance plan period. The forecast period in the impairment test therefore extends up to and including the year 2034.

The impairment test is based on three different scenarios. The first scenario is prepared with the main assumption that en route charges during both the upcoming performance plan period (RP 4) and the subsequent performance plan period (RP 5) do not

NOTE 7 Impairment of property, plant and equipment and intangible assets (continued)

sufficiently cover the required rate of return. The second scenario is prepared with the main assumption that en route charges in RP 4 are not sufficiently covering the required rate of return, while en route charges in RP 5 are. The third scenario is prepared with the main assumption that traffic development is gradually declining during the RP 4 period and ends up 5 percent lower than in scenario one for all subsequent years. These scenarios are probability-weighted with an added risk adjustment factor. The level of en route charges is based on Avinor’s estimates of the capital base and required rate of return, own traffic forecasts, and the best unit-level estimate of collected en route charges for the coming years.

For the impairment test as of 30 June 2025 the forecast period is from July 2025 up to and including 2034. From the terminal year 2035 onwards, it is assumed that revenues and costs will have a fixed growth factor. The value in use is calculated as the total of the discounted cash flows during the forecast period and the terminal value. The value in use comes from the terminal value.

The terminal year 2035 is the first year of the performance plan period RP 6. In addition to the assumption of fixed growth in revenues and costs at 2 percent, it is assumed that the RP 6 period will cover the cost base per 2034 as well as the return on capital employed corresponding to market-based return requirements. The return requirement after tax as of 30 June 2025 is 5.50 percent.

At year-end 2024, it was concluded that there was an impairment loss for assets related to en route services. The recognised impairment loss as of 31 December 2024 was presented on a separate line “impairments” in the 2024 profit and loss statement. The impairment for 2024 was fully allocated to the segment air navigation services. The impairment affected intangible assets, property, plant and equipment, and assets under construction.

Conclusion

The impairment test carried out as of 30 June 2025 shows that the value in use based on the assumptions presented exceeds the book value of the assets. Consequently, Avinor has concluded that, as of 30 June 2025, no further losses due to impairment of assets for the cash-generating unit en route services shall be recognised.

NOTE 8Pensions

Avinor uses pension assumptions prepared by the Norwegian Accounting Standards Board as a starting point when calculating pension liabilities. The latest update from the Norwegian Accounting Standards Board was as of 31 December 2024.

Financial assumptions used to calculate the Group’s pension liabilities represent management’s best estimate of long-term future levels of return and remuneration.

Assumptions used to calculate the group’s pension liabilities

	30 JUNE	30 JUNE	31 DECEMBER
	2025	2024	2024
Discount rate and future return on plan assets	3,90 %	3,30 %	3,90 %
Expected salary increases	4,00 %	3,50 %	4,00 %
Expected pension increases	3,00 %	2,80 %	3,00 %
Expected regulation in the national insurance scheme basic amount (g)	3,75 %	3,25 %	3,75 %

Pension obligation

	30 JUNE	30 JUNE	31 DECEMBER
	2025	2024	2024
Net pension obligation at 1 January	3 879,4	5 207,7	5 207,7
Pension cost	199,2	200,7	414,1
Payment of pensions and premiums (incl. soc. sec. cost)	(14,6)	(150,0)	(776,7)
Actuarial gains/losses	192,4	(220,9)	(965,7)
Net pension obligation at the end of the period	4 256,4	5 037,4	3 879,4

In addition to the pension costs in the table above, a defined contribution pensions cost of NOK 108.1 million has been recognised in the period January – June 2025 (NOK 104.7 million in the corresponding period in 2024), as well as costs for contractual early retirement pension scheme (AFP) of NOK 19.3 million (NOK 25.1 million).

NOTE 9Borrowings and lease liabilities

Movement in borrowings and lease liabilities

Opening net book amount at 1 January	28 156,8	24 555,8	24 555,8
Proceeds from long-term loans	-	5 780,9	5 780,9
Repayment of long-term loans	(2 789,7)	(485,7)	(832,6)
Reduction of lease liabilities	(22,9)	(18,9)	(40,5)
Proceeds from short term borrowings (certificate loans)	-	1 650,0	1 650,0
Repayment of short term borrowings (certificate loans)	-	(2 000,0)	(3 149,9)
Net changes in borrowings with cash flow effect	(2 812,6)	4 926,3	3 407,9
Other changes in liabilities	6,1	8,8	186,2
Currency/value changes	(883,9)	(318,1)	6,9
Closing net vook amount at the end of the period	24 466,4	29 172,8	28 156,8

OVERDRAFT FACILITIES

Avinor Group has a revolving overdraft facility of NOK 6 000 million (maturity in 2030) and an overdraft facility of NOK 300 million linked to the group bank account arrangement in Nordea Bank. There have never been withdrawals on these facilities.

NOTE 10 Financial instruments

FAIR VALUE

The fair value of interest rate swaps, currency forward contracts and power price derivatives is determined by using market value on the balance sheet date.

The carrying value of cash and credit facilities is approximately equal to fair value due to the fact that these instruments have short maturity periods. Similarly, the carrying value of accounts payable is approximately equal to fair value as they are entered into under ‘normal’ conditions. This also applies to accounts receivable except for customers with significant overdue, unpaid outstanding amounts. The written down value of the overdue receivables is considered to be a fair approximation of the fair value.

The fair value of long-term debt is calculated by using quoted market prices or interest terms for debt with similar maturity and credit margin. The fair value of certificate loans is the same as the principal.

Fair value by valuation method

The levels for valuation of assets and liabilities at fair value are as follows:

- Level 1: quoted price in an active market for an identical asset or liability.
- Level 2: valuation based on other observable factors either directly (price) or indirectly (derived from prices) other than the quoted price (used in level 1) of the asset or liability.
- Level 3: Valuation based on factors not derived from observable markets (unobservable assumptions).

The Group’s derivative financial instruments are valued at level 2 in the fair value hierarchy.

Note information provided about the fair value of interest-bearing debt is valued at level 2 in the fair value hierarchy.

There have been no transfers between the levels of fair value for any of the Group’s financial instruments, either in 2024 or 2025.

Interest-bearing debt: carrying amount and fair value

Amounts in NOK million	30 JUNE 2025		30 JUNE 2024		30 DECEMBER 2024

NOTE 12 Major construction projects

New airport Bodø

In December 2021, the Norwegian Parliament approved the construction of a new airport in Bodø. The project involves moving the current airport to make areas for the further development of the city available. The new airport is scheduled to be put into operation in 2029-2030. The project is financed by Avinor, the state and Bodø municipality.

In the second quarter of 2025, Avinor and HENT AS signed the contract for terminal works phase 2 (implementation phase). For a more detailed description of the project, including agreed financial limits and financing, please refer to Avinor’s Annual and Sustainability Report 2024. Grants/contributions from the state are accounted for in accordance with IAS 20 Accounting for Government Grants and Disclosure of Government Assistance.

Financial status

Specification of how the new Bodø Airport is reflected in the financial statements as of the first quarter 2019 excluding the purchase of land:

NOTE 12 Major construction projects (continued)

New airport Mo i Rana

In June 2021, the Norwegian Parliament approved the construction of a new airport in Mo i Rana, which will replace the current airport at Røssvoll. The new airport will be financed by the state as well as contributions from Rana municipality and local businesses.

The present financing is based on increased grants approved by the Norwegian Parliament in connection with the revised national budget 2023. There is an ongoing approval process between the state and the EAA supervisory authority EAA to ensure that the financing of the project, based on the increased framework, still complies with the EAA agreement for government subsidies.

For a more detailed description of the project, including agreed financial limits and financing, please refer to Avinor’s Annual and Sustainability Report 2024. Grants/contributions from the government are accounted for in accordance with IAS 20 Accounting for Government Grants and Disclosure of Government Assistance.

NOTE 13 Commitments and contingencies

Environmental obligations

The Group have significant obligations related to the clean-up of PFAS contamination, mainly from fire training sites at several airports. PFAS are fluoride-organic compounds that were previously added to firefighting foam and may be spread on the ground of the airports and to nearby natural environments. These pollutants constitute a risk to local natural environments and human health. Norway has committed internationally to reducing emissions and leakage of these compounds. In recent years, Avinor has received several demands from the Norwegian Environment Agency requiring mapping, preparation of action plans, and implementation of clean-up measures at several locations where there is PFAS contamination.

Avinor has conducted and continues to conduct additional surveys and mapping of soil, water, sediment, and biota at priority locations. The Group is actively exploring alternative remediation methods as a potential alternative to the traditional cleanup method of excavation, transportation and disposal at an approved landfill. It may be possible to carry out the remediation at several airports at a lower cost with alternative methods. However, this requires good documentation and the acceptance of environmental authorities. Avinor is making considerable efforts on remedial alternatives at locations to assess and implement measures that capture as much PFAS as possible in the most cost-effective way. Site-specific pollution surveys are being conducted, remedial plans are being prepared, and cleanup work is being carried out at several locations. External parties are used to prepare remedial plans and carry out cleanup work.

The provision recorded for future environmental liabilities carries risk of uncertainty. This relates, among other things, to the number of locations that may be subject to remediation orders, possible future changes in limit values or acceptance criteria from the Norwegian Environment Agency, development of and experience with new remediation methods, market price increases, and volume calculations. The environmental liability is continuously updated with new information that is relevant to the cleanup costs and is based on management’s best cost estimates for the specific locations at any given time. The provision is calculated at present value to reflect that the clean-up work is carried out over time.

Change in provision for environmental obligations

	30 JUNE	30 JUNE	31 DECEMBER
Amounts in NOK million	2025	2024	2024
Provision at 1 January	831,0	842,9	842,9
Adjustment classification *	-	-	15,0
Change in accrual due to new information	(10,0)	76,9	154,9
Effect present value calculation	14,7	(18,7)	(21,0)
Performed clean up	(33,7)	(27,2)	(160,8)
Provision at the end of the period	802,0	873,9	831,0

* In connection with the review of allocations, it has been concluded that parts of a provision made in 2022 related to clean-up work for the restoration of leased land areas are to be considered PFAS/environmental clean-up costs.

New pension schemes

The new Act on Public Sector Pensions, with effect from 1 January 2020, was adopted by the Norwegian Parliament (Stortinget) in June 2019. The new act did not contain regulations with respect to new early retirement schemes and retirement schemes for employees with special age limits.

In April 2024, Stortinget adopted a new act on lifelong contractual early retirement pension (AFP) in the public sector for persons born in 1963 or later. For persons born in 1962 or earlier, the contractual pension is calculated according to the old rules. With the new act, AFP in public sector is changed from an early retirement scheme to a scheme that provides a lifelong supplement to the retirement pension from the national pension scheme. The new rules will apply from 2025. At the date for the presentation of the interim report for the first half of 2025, not all details regarding the financing of the scheme have been approved. Furthermore, no

NOTE 13 Commitments and contingencies (continued)

final decision has been made on how Avinor will deal with the new regulations for employees who do not formally participate in a public pension scheme. These issues are expected to be clarified in 2025.

The Government and the parties in the public sector have agreed on a new agreement for occupational groups that have special age limits providing such groups with a lifelong supplement/special age allowance. The allowance is intended to ensure that occupational groups with special age limits do not receive less pension if they want to retire earlier than employees without special age limits. The agreement does not specify the occupational groups that will have special age limits or what the age limit will be. Although the rules will apply from January 2025, they have not yet been adopted and are not expected to be in place until 2026. No final decision has been made on how Avinor will comply with the new regulations for employees who are not formally participating in a public occupational pension scheme.

Private AFP

The Group has been part of the private AFP scheme (early retirement) that applies to all employees who have transitioned from defined benefit pensions in the Norwegian Public Service Pension Fund (SPK) to defined contribution pensions. The scheme is based on a tripartite collaboration between employers’ organisations, employee organisations and the state and is regarded as a defined benefit multi-enterprise scheme. At present, it is not possible, with a sufficient degree of reliability, to calculate the Group’s share of the obligations in the scheme. The scheme is therefore accounted for as a defined contribution scheme with ongoing expense recognition of premium payments.

Financing of new airport Mo i Rana

The basis for financing the new Mo i Rana Airport is that the project shall be financed by the state and local contributions, but Avinor bears the risk if the costs exceed the approved cost targets. The project is described in more detail in note 13 in the Group’s financial statements for 2024 and in note 12 in this interim financial report. The financial statements for 2024 are included in Avinor’s Annual and Sustainability Report for 2024.

The EFTA Surveillance Authority, ESA, approved the financing plan for the project in June 2022. Subsequently, in connection with the revised national budget for 2023, the Norwegian Parliament approved increased cost targets for the project, including financing increased runway length. There is an ongoing approval process between the state and the EFTA supervisory authority ESA to ensure that the financing of the project, based on the increased cost targets, still complies with the EFTA agreements for government subsidies. The outcome of the process may affect the proportion of the project that must be financed by Avinor.

NOTE 14 Events after the reporting period

There have been no events in the period after 30 June 2025 that affect the interim financial report for the second quarter and first half of 2025.

Statement from the Board of Directors and the CEO

We confirm to the best of our knowledge that:

- The interim report, which covers the period 1 January to 30 June 2025, has been prepared in accordance with IAS 34 Interim Financial Reporting, and that the information in the report gives a true and fair view of the Group’s assets, liabilities, financial position and profit or loss as a whole.
- The interim report for the period 1 January to 30 June 2025 provides a true and fair view of important events in the accounting period and their impact on the interim financial statements, as well as a description of the most important risks and uncertainties facing the Group in the next accounting period.

Alternative performance measures (APM)

Avinor prepares group accounts in accordance with the International Financial Reporting Standards (IFRS) as determined by the EU. Alternative performance measures are target figures that are not defined or specified in IFRS but applied to provide supplementary information on operations and financial position. The alternative performance measures are consistently calculated over time and derived from financial figures calculated in accordance with IFRS.

OPERATING PROFIT BEFORE DEPRECIATION, AMORTISATION AND IMPAIRMENT CHARGES/ EBITDA

The profit target shows profit before financial items, tax, depreciation, amortisation and impairment charges.

Avinor uses EBITDA as an alternative performance measure, as this is an approach to calculating free cash flow from operations.

EBITDA can be directly reconciled against and is specified on a separate line in the income statement.

ADJUSTED OPERATING INCOME, OPERATING EXPENSES, EBITDA AND OPERATING PROFIT

As of the second quarter of 2024, Avinor shows operating revenues, operating expenses, EBITDA and operating profit adjusted for other income/expenses as shown below. Comparative periods are calculated correspondingly.

INTEREST-BEARING DEBT

Avinor uses interest-bearing debt as an alternative performance measure to provide information on the level and development of interest-bearing debt in the Group.

Calculation and reconciliation of interest-bearing debt

Amounts in NOK million	SOURCE	30 JUNE	30 JUNE	31 DECEMBER
		2025	2024	2024
Lease liabilities, non-current	Statement of financial position	444,0	298,7	459,8
Other non-current liabilities	Statement of financial position	22 442,7	23 653,7	23 586,8
Long-term interest-bearing debt		22 886,7	23 952,4	24 046,7
Lease liabilities, current	Statement of financial position	52,6	40,7	54,6
Sertificate loans	Statement of financial position	-	1 150,0	-
First annual installment on non-current liabilities	Statement of financial position	1 527,1	4 029,7	4 055,5
Short-term interest-bearing debt		1 579,7	5 220,4	4 110,1
Interest-bearing debt		24 466,4	29 172,8	28 156,8

NET INTEREST-BEARING DEBT

Net interest-bearing debt is the starting point for calculating the equity ratio which is the basis for equity covenants in loan agreements and the company’s Articles of Association.

Calculation and reconciliation of net interest-bearing debt

Amounts in NOK million	SOURCE	30 JUNE	30 JUNE	31 DECEMBER
		2025	2024	2024
Interest-bearing debt	APM	24 466,4	29 172,8	28 156,8
Interest rate and currency swaps - liabilities	Note 10	487,5	1 107,5	528,5
Interest rate and currency swaps - assets	Note 10	(2 047,9)	(2 466,6)	(3 243,5)
Cash and cash equivalents	Statement of financial position	(1 606,4)	(5 507,0)	(4 637,7)
Net interest-bearing debt		21 299,5	22 306,7	20 804,1

EQUITY COVENANTS LOAN AGREEMENTS

Avinor provides information about the equity ratio related to loan agreements to inform about the company’s compliance with covenants set by lenders in connection with loans granted to Avinor.

Equity covenants are specified in loan agreements with the European Investment Bank, the Nordic Investment Bank and on unused credit facilities. According to the loan agreements, the Group’s equity ratio cannot be below 30 per cent of total equity and net interest-bearing debt.

Calculation and reconciliation of equity ratio in accordance with loan agreements

Amounts in NOK million	SOURCE	30 JUNE	30 JUNE	31 DECEMBER
		2025	2024	2024
Equity	Statement of financial position	15 132,1	13 522,6	15 106,2
Net interest-bearing debt	APM	21 299,5	22 306,7	20 804,1
Equity and interest-bearing debt		36 431,7	35 829,3	35 910,3
Equity ratio loan agreements *		41,5 %	37,7 %	42,1 %

* Equity as a percentage of equity and net interest-bearing debt

EQUITY RATIO DETERMINED BY THE COMPANY’S ARTICLES OF ASSOCIATION

Section 5 of Avinor’s Articles of Association has an explicit requirement for an equity ratio, generally referred to as the equity ratio according to the company’s Articles of Association.

Avinor uses the equity ratio according to the company’s Articles of Association as an alternative performance measure as this is a key figure for assessing the Group’s solidity and external borrowing capacity.

Section 5 of the Articles of Association: Long-term loans for financing non-current assets can only be raised within limits ensuring that the Group’s equity does not fall below 40 per cent of the total of the Group’s net interest-bearing debt and equity at any time. When entering into long-term loan agreements, a pledge cannot be placed on certain assets in Avinor AS or subsidiaries that are part of the Group’s core operations.

The accounting standard for calculating lease liabilities related to finance leases (IFRS 16) was implemented after section 5 of the Articles of Association was established. In management’s opinion, the implementation of new accounting standards should not affect the equity ratio according to the company’s Articles of Association. Accordingly, lease liabilities are subtracted from net interest-bearing debt when calculating the equity ratio.

Calculation and reconciliation of equity ratio according to the company’s Articles of Association

		30 JUNE	30 JUNE	31 DECEMBER
Amounts in NOK million	SOURCE	2025	2024	2024
Net interest-bearing debt	APM	21 299,5	22 306,7	20 804,1
Lease liabilities, long-term	Statement of financial position	(444,0)	(298,7)	(459,8)
Lease liabilities, short-term	Statement of financial position	(52,6)	(40,7)	(54,6)
Net interest-bearing debt - excluding lease liabilities		20 802,9	21 967,3	20 289,7
Net interest-bearing debt - excluding lease liabilities		20 802,9	21 967,3	20 289,7
Equity	Statement of financial position	15 132,1	13 522,6	15 106,2
Equity and net interest-bearing debt - excluding lease liabilities		35 935,0	35 489,9	35 395,8
Equity ratio (according to section 5 of the company's Articles of Association) *		42,1 %	38,1 %	42,7 %

* Equity as a percentage of total equity and net interest-bearing debt - excluding lease liabilities

EQUITY RATIO

Avinor uses equity ratio as an alternative performance measure to provide information about the Group’s solidity.

Calculation and reconciliation of equity ratio

		30 JUNE	30 JUNE	31 DECEMBER
Amounts in NOK million	SOURCE	2025	2024	2024
Equity	Statement of financial position	15 132,1	13 522,6	15 106,2
Equity and liabilities	Statement of financial position	48 376,7	52 895,7	51 537,4
Equity ratio		31,3 %	25,6 %	29,3 %

CASH FLOW BEFORE CHANGES IN DEBT

Avinor uses cash flow before changes in debt as an alternative performance measure to provide information on the level of cash flows generated exclusive of the effects of increased or reduced debt. This provides information on the Group’s liquidity development before repayments on loans and gives an indication of the need for additional capital through borrowing.

Calculation and reconciliation of cash flow before changes in debt

		30 JUNE	30 JUNE	31 DECEMBER
Amounts in NOK million	SOURCE	2025	2024	2024
Net cash flow from operating activities	Statement of cash flows	2 155,6	1 311,9	3 472,2
Net cash flow used in investing activities	Statement of cash flows	(1 774,2)	(1 642,1)	(2 649,9)
Interest paid	Statement of cash flows	(600,0)	(512,3)	(998,4)
Other borrowing charges	Statement of cash flows	-	-	(17,4)
Cash flow before changes in debt		(218,6)	(842,5)	(193,5)

NON-FINANCIAL MEASURES

Avinor also applies non-financial measures to provide information on operations. Non-financial measures are not derived from financial numbers calculated in accordance with IFRS. Non-financial measures are consistently defined over time. Key non-financial measures are described below.

Regularity

Regularity indicates the proportion of scheduled flights that are actually carried out.

Punctuality

Punctuality indicates the proportion of flight departures that were on schedule or less than 15 minutes late.
