

New ten-year green term-loan facility

13.12.2021 14:00:00 CET | Entra ASA | Additional regulated information required to be disclosed under the laws of a member state

Entra ASA has secured a new ten-year, green term-loan facility of NOK 1.0 bn with the Nordic Investment Bank.

The facility is earmarked to the Entra redevelopment projects in Tordenskiolds gate 12 and St. Olavs plass 5 in Oslo with the aim of improving the energy efficiency of the buildings to increase the offer value both to owners and tenants.

Both buildings are expected to be aligned with the EU Taxonomy for climate change mitigation and scheduled for completion in Q3 2022. The targeted certification level for both properties is BREEAM In-Use Excellent.

"We are very pleased with our cooperation with the Nordic Investment Bank and how they work with companies focusing on sustainability. Further, it is fulfilling to see that Entra's ambitious environmental strategy and continuous focus on developing environment friendly buildings also is a competitive advantage and enables significantly better terms in the financing market", says CFO Anders Olstad
