

PRESS RELEASE

The U.S. Department of Defense continues standardization on Cyviz solutions: Contracts awarded valued at NOK 23 million (USD 2.6 million) in Q4 2020

January 11, 2021

Cyviz is pleased to announce contracts with the U.S. Department of Defense for Cyviz' standardized, turnkey video collaboration solutions. The total value is approximately NOK 23 million (USD 2.6 million), including solutions for mission-critical command & control centers with multi-year support and software maintenance agreements. The solutions will be delivered in the first half of 2021.

Multiple departments within the U.S. Department of Defense have standardized on Cyviz software and hardware solutions. The contracts awarded in last quarter of 2020 include mission-critical, multi-agency Joint Operation Centers (JOC), Security Operation Centers (SOC), Network Operation Centers (NOC), and Mobile Deployable Systems.

- The standardization of conference rooms, control rooms and experience centers among large organizations is a growing trend, and we are pleased to see the U.S. Department of Defense continuing standardization efforts for their most critical control rooms, comments CEO Espen Gylvik.

The Cyviz solutions enable superior situational awareness and decision-making through the support of visualization of high-resolution data content from hundreds of video sources for multiple video walls. In addition, the Command & Control solutions from Cyviz adhere to strict requirements for multi-classification security, 24/7 reliability, and the integration with video conferencing systems from Cisco. The Cyviz Easy Software Platform was chosen for its unique ability to provide a dynamic, integrated, and multi-purpose collaboration space where physical and virtual worlds co-exist. Due to the nature of defense operations, the Cyviz solutions are particularly relevant. With a standardized and configurable platform, both deployment and management are more predictable. It also allows for deployed systems to be monitored, supported and upgraded by a centralized team, ensuring functionality and availability at all times.
