

First system integrator sale in Eastern Europe for Nordic Unmanned

29th of March 2021 – Sandnes – Nordic Unmanned delivers two sets of Lockheed Martin Indago 3 systems with integrated Radionor antennas to an Eastern European client. The delivery marks the first system integrator, training, and Life Cycle Support (LCS) sale to an Eastern European client of the Lockheed Martin Indago 3 by Nordic Unmanned.

Additionally, Nordic Unmanned will deliver lifetime support and service for the Lockheed Martin Stalker VXE, alongside training of fixed wing pilots and technicians, to the same client. Eastern Europe has been early adapters of unmanned technology, and this is the first sale of Lockheed Martin systems for Nordic Unmanned in this region, showing the importance of such platforms to security agencies in this area.

Knut Roar Wiig, CEO at Nordic Unmanned stated: We experience a high demand for our lightweight RPAS services, with the likes of the Lockheed Martin Indago 3. We are happy to provide lifetime support and training for the Lockheed Martin Stalker VXE, which adds additional value to our clients, due to this electrical air vehicle having long endurance and low acoustic signature.
