

Tekna uplisted to the main list of the Oslo Stock Exchange

1.7.2022 10:00:00 CEST | Tekna Holding ASA | Additional regulated information required to be disclosed under the laws of a member state

(Arendal, NORWAY / Sherbrooke QC, CANADA) Tekna Holding ASA (Tekna, OSE: TEKNA), the world-leading provider of advanced materials to industry, today announces that the company has been uplisted to the main list of the Oslo Stock Exchange (OSE), with the first day of trading being today, 1 July 2022. Tekna was first listed on Euronext Growth on 30 March 2021.

“This marks a significant milestone in Tekna’s growth journey. Over the years, we have developed a strong position in the market with an impressive customer base. We have implemented a reputable industrial manufacturing capability and we are expanding machine capacity to meet global demand. Stepping into the main list of the OSE will further increase our visibility in the marketplace and cement our position as a leading provider of advanced material solutions in our core segments; additive manufacturing, printed electronics and energy storage. I would like to thank our team, our shareholders and our business partners for their relentless support and hard work that has enabled this achievement,” said Luc Dionne, CEO of Tekna.

About Tekna Holding ASA

Tekna is a world-leading provider of advanced materials to industry, headquartered in Sherbrooke, Canada.

Tekna produces high-purity metal powders for applications such as 3D printing in the aerospace, medical and automotive sectors, as well as optimized induction plasma systems for industrial research and production. With its unique, IP-protected plasma technology, the company is well positioned in the growing market for advanced nanomaterials within the electronics and batteries industries.

Building on 30 years of delivering excellence, Tekna is a global player recognized for its quality products and its commitment to its large base of multinational blue-chip customers. Tekna’s powder products increase productivity and enable more efficient use of materials, thereby paving the way towards a more resilient supply chain and circular economy.
