

Tekna signs two TEK15 system contracts

20.7.2022 07:45:00 CEST | Tekna Holding ASA | Non-regulatory press releases

(Arendal, NORWAY / Sherbrooke QC, CANADA) Tekna Holding ASA (Tekna, OSE: TEKNA), the world-leading provider of advanced materials to industry, today announces that the company has signed contracts for the sales of two research scale plasma systems TEK15 models which enable the development of highly spherical metallic or ceramic powders.

The orders amount to a total value of CAD 1.45 million and will be delivered to customers early 2023. The systems will be used in a government research center in Asia and by a private company in the USA for commercial R&D purposes.

The TEK15 system can be used for the development of spherical powder, nanomaterials and coatings. The sold systems are to be used to develop spherical powder of various materials to be applied in additive manufacturing (AM), for instance binder jetting and metal injection molding (MIM).

“Our TEK15 system fosters innovation by enabling our customers to experiment with many different materials. The system has been developed to allow users to explore different plasma environments and conditions and make swift adjustments to produce different variations of materials. These agreements take the number of units sold up to 57 and correspond with the increased demand Tekna is experiencing for its advanced materials,” said Romain Vert, Director of System Sales at Tekna.

About Tekna Holding ASA

Tekna is a world-leading provider of advanced materials to industry, headquartered in Sherbrooke, Canada.

Tekna produces high-purity metal powders for applications such as 3D printing in the aerospace, medical and automotive sectors, as well as optimized induction plasma systems for industrial research and production. With its unique, IP-protected plasma technology, the company is well positioned in the growing market for advanced nanomaterials within the electronics and batteries industries.

Building on 30 years of delivering excellence, Tekna is a global player recognized for its quality products and its commitment to its large base of multinational blue-chip customers. Tekna’s powder products increase productivity and enable more efficient use of materials, thereby paving the way towards a more resilient supply chain and circular economy.
